

# Analysis of content impact on subjective quality assessment of 3D video affected by bit-rate reduction

Dawid Juszka

## Acknowledgements

This work would be impossible without the support from many remarkable people who were around me during previous years. Our life-paths have crossed, but they are innocent as a lamb.

First, I would like to express my sincere gratitude to my supervisor Professor Zdzisław Papir. His synthetic approach to delivering ideas with respect to analytical thinking helped me throughout the entire research period and whilst writing of this thesis.

I would like to thank Bogdan Ćmiel Ph.D., my auxiliary supervisor, who shared his expertise in statistics and methods for data analysis. Such support made my decisions ironclad. Collaboration with Bogdan would not be possible without Adam Ćmiel Ph.D. to whom I am also indebted for the fruitful consultancy. My sincere thanks also go to Professor Michał Wierzchoń (Jagiellonian University) whose advice on psychological issues of my experiments was helpful. His expertise and outstanding ability to instantly distil an accurate psychological problem from a technical description is inspiring for me.

Having an acceptance from heads of Department of Telecommunications is not mandatory for starting Ph.D. studies, but it undeniably makes difference in Quality of Experience. That is why I would like to thank Professor Andrzej Pach, who, as a leader created a great environment for work and collaboration. Given this opportunity I feel very honoured. I would like to thank Professor Marek Natkaniec, who took over the reins in the Department and also ensured I still felt welcomed there.

My thanks are also due to my colleague from Department of Telecommunications with whom I cooperated in scientific projects: Michał Grega Ph.D., Mikołaj Leszczuk Ph.D., Lucjan Janowski Ph.D., Jarosław Bułat Ph.D., Piotr Romaniak Ph.D. – they introduced me into scientific team work and gave me an opportunity to listen and share ideas during project meetings.

My time in room 309 at Department of Telecommunication was fruitful and spent in the wonderful presence of friends. I experienced a lot of

support and motivation from an amazing marriage: Professor Katarzyna Kosek-Szott and Professor Szymon Szott. The role of Michał Grega Ph.D. is also remarkable – his attitude, kindness, the way he works, manages projects and prepares grant applications helped me in my own attempts and in dealing with successes.

Many thanks are also due to my friends: Michał Hajduk M.Sc., Konrad Gałczyński M.Sc., Michał Trzeciak M.Sc. and Michał Szachnitowski M.Sc. for their support and patience.

My warm thoughts go to my parents – Kazimiera and Henryk and their enormous effort, which brought me to this point. I would like to thank my older brother Karol for (unconsciously) bushwhacking many life-paths for me.
